FOREIGN NEWS

German Soldiers Denounced.

New York, Nov. 19.—A cable to the Sun from Peking, dated November 17th, says: The conduct of the German soldiers at Chou Chou has been denounced by Rev. W. S. Ament of the American Board of Foreign Missions who complained to Count von Waldersee that a soldier told him from forty to sixty women who were in hiding in haystacks from the the soldiers had been assaulted. The soldiers had also imposed a fine of 3,000 taels on the head official of the town, and when the money was not forthcoming they confiscated everything in his home. When Ament went to Waldersee with his complaint, the latter referred him to a junior officer for redress.

Waldersee declares officially that he has stopped looting and restored peace in the southern part of China, and that repairs to the railway to Tien-Tsin will be completed by December 15th.

The foreign Ministers will hold another meeting on November 19th. BERLIN, Nov. 19.—Replying to Herr Babel and defending Emperor William with the Reichstag today, General von Gossler, minister of war, made this extraordinary statement: "What our troops are now doing in China is merely retaliation for what the Huns did to us for centuries."

This declaration was loudly applauded by the Right, but excited merriment in other sections of the chamber.

China May Be Cut Up.

New York, Nov. 20.—The China negotiations, according to a dispatch to the Times from Washington, have reached a most serious stage. The actions of the powers are making partition almost inevitable. The United States faces the probability that it will either have to take a slice of China or go without any indemnity. In that case, it is positively asserted by high authorities that the United States will go without indemnity.

The United States may succeed in reducing the demands of other powers and is now making every effort to that end, but with no immediate prospect of success.

Census of Hawaii.

WASHINGTON, Nov. 16.—The Census Bureau has issued a bulletin announcing the population of Hawaii by islands and districts. It shows the total population of Hawaii to be 154,001 and increase of 44,981, or 41.2 per cent over 1896, the last census there.

The population of Hawaii in detail by islands is as follows; Hawaii, 46,843; Kauai, 20,562; Niihau, 172; Maui, 15,460; Molokai and Lanai, 2,540; Oahu, 58,504. All the islands have increased materially in population since 1890 with the exception of Molokai and Lanai islands, which show a combined loss of 11.3 per cent.

Burned at the Stake.

LIMON, Col., Nov. 16.—Fire has avenged the death of little Louise Frent. Chained to an iron stake, Preston Porter, Jr. died a terrible death in a flaming pile of boards tonight. At 6:23 o'clock the father of the murdered girl applied the torch. Seven minutes later Porter was unconscious; in twenty minutes but a charred mass of flesh remained of the negro.

DENVER, Nov. 18.—A mass meeting attended by Governor Thomas and other prominent men strongly denounced the lynching.

The Czar Improving.

LIVIDIA, Nov. 20.—The bulletin issued by the Czar's physicians today is less favorable. It says:

"The Emperor passed a satisfactory day yesterday. At 9 in the evening the patient's temperature was 102.2, pulse 80. His Majesty slept tranquilly until 3 in the morning. Subsequently his rest was broken and perspiration appeared. This morning his condition was fairly satisfactory; temperature 100.4; pulse 70."

Morgan Returned as U. S. Senator.

MONTGOMERY, Ala., Nov. 15.—The joint caucus of Democrats of both houses of the Alabama Legislature tonight unanimously nominated J. E. Morgan as United States Senator. No other name was presented. Senator Morgan was called before the meeting and thanked the members for re-election. The ten opposition members of the Legislature in separate caucus pledged their votes to Morgan.

Thomas Edison's New Invention.

New York, Nov. 13.—Thomas Edison is perfecting an invention which promises an economic revolution for the industrial world. It is a plan to utilize all the energy stored in coal. Mr. Edison's invention aims to control the full power of coal by means of compressed air. By this means power enough could be extracted from a pound or two of coal to carry a man around the world.
